

DEEP DRAWING
C & K JOHANSEN A/S DENMARK

Rolling

CK Deep Drawing performs CNC controlled precision rolling and is competent and experienced. With our hightech machine park, we can combine many disciplines within metalworking and deliver complex items in both small and large series. Welding on bushings, bolts or plate parts are examples of this. Rolling is often combined with a number of our other skills.

With more than 100 years of experience you can safely bring your ideas to us. We find the best solution in a constructive and creative collaboration. Our competent employees follow the process all the way, and you get your personal contact person who knows all the details about your product.

We carry out rolling of steel sheets from Ø100 mm to Ø1000 mm in many different designs and dimensions.
